- **main page:** course description
- **lecture page:** slides, lecture notes
- **exercise page:** assignments, software

- **Osborne & Rubinstein.**
A Course in Game Theory.
Main source for the first half of this course. Quite formal.
- **Osborne.**
An Introduction to Game Theory.
Similar content as Osborne & Rubinstein, but less formal.
- **Nisan, Roughgarden, Tardos, & Vazirani.**
Algorithmic Game Theory.
Main source for the second half of this course

- lecture notes in English and German:
 - **en:** http://gki.informatik.uni-freiburg.de/teaching/ss18/gametheory/gametheory_en.pdf
 - **de:** http://gki.informatik.uni-freiburg.de/teaching/ss18/gametheory/gametheory_de.pdf(PDFs updated regularly)
- open \LaTeX sources (read-only):
<https://gkigit.informatik.uni-freiburg.de/teaching.gametheory/gametheory-lecturenotes/tree/master>
You may use and modify them. If you improve them, we are happy to include and acknowledge your contributions.
- slides available on course website
- additional resources: literature list on course website + **ask us!**

Target Audience

About the
Course
Rules

Students of Computer Science:

- Master of Science, any year
- Bachelor of Science, ~3rd year

Other students:

- advanced study period (~4th year)

Prerequisites

About the
Course
Rules

Course prerequisites:

- no required prerequisites
- some familiarity with mathematical notation and theoretical computer science is helpful, familiarity with Python 3 is assumed for the exercises.

Credit Points & Exam

About the
Course
Rules

- 6 ECTS points
- special lecture in specialization field
[Cognitive Technical Systems](#)
- [oral exam](#) of about 30 minutes for B.Sc. students
- [written or oral exam](#) for M.Sc. students (likely written)

Successful participation (50% of points) prerequisite for exam admission.

Written assignments:

- handed out once a week
- due one week later, before the lecture
- discussed in the next exercise session
- may be solved in groups of up to three students
- 8 points per exercise sheet

Didactic web-based experiments in game theory:

- See <http://gametheory.tau.ac.il/>.
- course number and class password will be sent by email
- experiments conducted intermittently (three to five times throughout course)
- about one week time to complete
- discussed in the next exercise session
- must be solved alone (not in groups)
- 4 points per set of experiments

- points can be earned for “reasonable” solutions to exercises and for participation in web-based experiments.
- at least 50% of points prerequisite for admission to final exam.

What is plagiarism?

- passing off solutions as your own that are not based on your ideas (work of other students, Internet, books, ...)
- <http://en.wikipedia.org/wiki/Plagiarism> is a good intro

Consequence: no admission to the final exam.

- We may (!) be generous on first offense.
- Don't tell us “We did the work together.”
- Don't tell us “I did not know this was not allowed.”
