

Advanced AI Techniques

Wolfram Burgard, Luc de Raedt,
Bernhard Nebel, Lars Schmidt-Thieme

Institute of Computer Science
University of Freiburg
<http://www.informatik.uni-freiburg.de/>

I. Learning Bayesian Networks

II. Probabilistic Approaches to Natural Language Understanding

III. Probabilistic Approaches in Robotics (MDPs and POMDPs)

VI. Game-Theoretic Approaches to Multi-Agent Systems

Each of these topics will be covered in roughly four weeks.

I. Learning Bayesian Networks

II. Probabilistic Approaches to Natural Language Understanding

III. Probabilistic Approaches in Robotics (MDPs and POMDPs)

IV. Game-Theoretic Approaches to MAS

V. Organization

1. Bayesian Networks – Introduction / Repetition

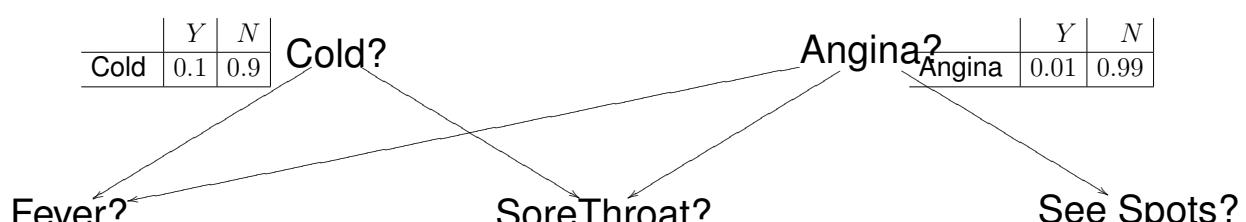

structure: The graph structure encodes the factors of a JPD:

- nodes represent variables,
- edges represent "direct dependencies".

parameters: Specified by a conditional probability table (CPT) attached to each node quantify direction / strength of dependencies:

$$p(x \mid \text{fanin}(x))$$

$$p(x_1, \dots, x_n) = \prod_{i=1}^n p_i(x_i \mid \text{fanin}(x_i))$$

Cold	Y	N
Angina	Y	N
Fever	Y	0.8 0.4

Cold	Y	N
Angina	Y	N
Sore Th.	Y	0.9 0.2

Angina	Y	N
Spots	Y	0.2 0.001

Figure 1: Example Bayesian Network.

Advanced AI Techniques / I. Learning Bayesian Networks

2. Learning Parameters

If we know

- which variables may influence which others (the structure),
- but not the exact quantities (the parameters),
- and we have data,

we can estimate the parameters from data.

Case	Cold	Angina	Fever	Sore Throat	See Spots
1	Y	N	Y	N	N
2	N	Y	Y	N	Y
3	Y	N	N	Y	N
4	Y	Y	N	N	N
5	N	N	Y	Y	Y
6	N	Y	Y	Y	N
7	Y	Y	N	N	Y

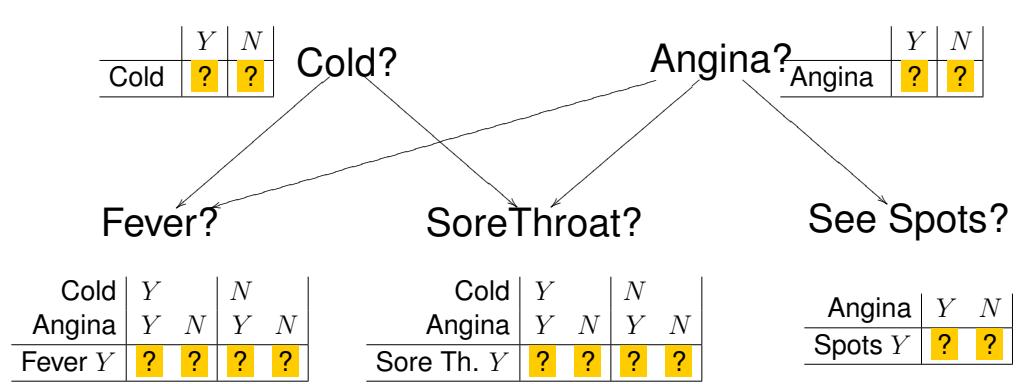

Figure 2: Bayesian network structure with unknown parameters.

2. Learning Parameters / Missing Data

If we know

- which variables may influence which others (the structure),
 - but not the exact quantities (the parameters),
 - and we have data with some missing value,
- we still can estimate the parameters from data (as well as the missing values).

Case	Cold	Angina	Fever	Sore Throat	See Spots
1	Y	N	Y	N	N
2	?	Y	Y	N	Y
3	Y	N	?	Y	N
4	Y	Y	N	N	N
5	N	N	Y	Y	?
6	N	Y	Y	Y	N
7	Y	Y	N	N	Y

3. Learning Structure

Learning structure requires

- the specification of a model selection criterion as well as
- a search procedure over a subspace of possible graph structures.

Case	Cold	Angina	Fever	Sore Throat	See Spots
1	Y	N	Y	N	N
2	N	Y	Y	N	Y
3	Y	N	N	Y	N
4	Y	Y	N	N	N
5	N	N	Y	Y	Y
6	N	Y	Y	Y	N
7	Y	Y	N	N	Y

Exercises and tutorials

- Weekly Tutorials by Niels Landwehr, Alexander Scivos and Karen Tso
first tutorial at Fr. 18.11. 10:00 – 11:45.

- One exercise sheet per week
first sheet at Tue. 8.11.

- Sheets are due next Tuesday
and will be discussed the following Friday in tutorial.

Zwei offene Stellen als wissenschaftliche Hilfskraft in der Gruppe CGNM:

- Interesse an Maschinellem Lernen / Datenanalyse / wissenschaftlichem Programmieren
- Sehr gute Java- oder C++-Kenntnisse.

Zunächst für 1/2 Jahr,
aber wir haben vor allem Interesse an Studenten, die mindestens
1 – 1 1/2 Jahre bleiben möchten.

Bei Interesse, Email schicken oder vorbeischauen.
