

# Introduction to Multi-Agent Programming

## Exercise 1 (Deadline 30-10-2008)

### Install and test the rescue simulation software

1. Run the `sampleexplorationagents.sh` until end. Submit the log files (**not including `rescue.log`**) in the boot directory.
2. Create a package `grp[X]` (directory) according to `mas08` for your group. Submit the java code via e-mail.
